Project Title: Marie Curie

I would like to build this website as multiple pages as there are many different aspects of her life that I would like to present. Given that there is a lot of information on the Wikipedia page, some information in the subpages will likely be edited and cut down. I imagine the homepage with her face with a simple navigation bar at the top.

- **Summary/Introduction** – introduce Marie Curie, focus on her research and her significance as a women in science
- **Early Years** – this will be a combination of her childhood years, family history, as well as some information on her university years and early research career in Paris
- **New Elements/Nobel Prizes** – her important scientific discoveries and the subsequent 2 Nobel Prizes that she won (this section will likely be edited down for clarity)
- **Legacy**
- **Honours/Tributes** – her awards along with modern tributes and portrayal in modern pop culture
- **Sources** – list the Wikipedia page and other resources for photos
